

i feel that this is a joke why should the goverment try to take away are freedom to purchase what we whant we are paying for this service it is very helpful in planing routes through town on regular radio you have to wait tell you get close to the city and then listen to all the other programing tell they get to the weather with xm you can get the weather and traffic way before you get to town the problem i have with this is what is the differance between suscribers paying for this service and the raidio stations get paid by advertisers paying them to do the weather in my mind it is the same so why try to limit us thank you for your time  
proud xm suscriber
